The incidence of modern civilization diseases has increased over the past decade. Heart failure, diabetes, stroke, cancer, hypertension, kidney failure and other diseases are no longer unfamiliar terms to everyone. Why are they suffering from the modern civilization disease?

现代文明病的病发率在近几十年来逐年上升；心脏衰竭、糖尿病、中风、癌症、高血压、肾脏衰竭等病症已家喻户晓，司空见惯。那么，人们是如何患上现代文明病的呢？

## The 4 Major Root Causes of Diseases 4大主要疾病的根源：

Free Radicals 自由基	Lack of Oxygen 缺氧	Acidic Body 酸性体质	Imbalanced Diet 营养不均衡
<p>Free radicals are primary cause of aging and disease. Experts estimate that each cell in the body suffers 10,000 free radicals "hits" per day.</p> <p>自由基是引起人体老化和疾病的主要原因。专家估计人体的每一个细胞每天都要遭受大约10,000次自由基的攻击。</p>	<p>"All chronic pain, suffering and diseases are caused from the lack of oxygen at the cellular level". Dr. Arthur C. Guyton, M.D (U.S. Medical Experts and Cardiac Physiologist)</p> <p>"所有的慢性疼痛与疾病都是由细胞缺氧所引起的。" 亚瑟·C. 圭腾博士 (美国医学专家、心脏医学专家)</p>	<p>"Every single person who has cancer has a pH that is too acidic". Dr Otto Warburg (Winner of the 1931 Nobel Prize in Physiology)</p> <p>"每一位癌症病患的体质都是多属于呈酸性的。" 奥图·瓦尔堡博士 (1931年生理学诺贝尔医学奖得主)</p>	<p>An unhealthy diet is known to be a major cause of various chronic disease.</p> <p>不良饮食习惯是延伸出各种慢性疾病的主要因素之一。</p>

所谓预防胜于治疗，要彻底远离疾病，就得维持身体的健康。细胞食物能够将累积在体内的毒素排出体外以及提供均衡的营养。
