益生菌

CryoBac 193

2g X 30 Sachets

Probiotics are little GUARDs for health that occur naturally inside human body! Stress, drug abuse, antibiotics, inadequate exercise, poor diet and unhealthy lifestyle like smoking and drinking alcohol cause of gut flora imbalance! This leads to harmful bacteria becoming excessive and toxins will start to accumulate. A toxic body environment leads to a series of underlying disease, e.g. obesity, indigestion, constipation, diarrhea, colitis and even cancer! Hence, supplementation of probiotics is no longer a luxury but a need in these days of prevalent toxins!

益生菌是人体内自然存在的健康小卫士! 生活压力、滥用药物、抗生素、缺乏运动、不良饮食及作息如吸烟、饮酒都已严重导致人体肠道内的菌群失调! 当肠道害菌过多时, 毒素会累积在体内, 逐渐引起各种疾病如: 肥胖、消化不良、便秘、腹泻、肠炎甚至肠癌! 因此, 我们极需要补充足够的益生菌。

1
