Silver Bullet

10g X 20 sachets

Medical experts acknowledged that we all have cells that go bad due to DNA damage but fortunately, our body has a natural recovery mechanism to repair the damaged cells or eliminate the cells by the immune system if the damage is irreversible.

However, the performance of our recovery and immune system decline over time due to the body toxin accumulation. Everyday, we are exposed to toxins from air, food, water and stress. In fact, a major toxic load comes from our own metabolic wastes and other toxins produced within our own body.

Thus, the cells lose their protection and cell damage become prominent. Signs and symptoms of diseases start appearing which eventually lead to many diseases and even cancer.

据医学专家研究证实，我们体内的细胞会因基因受损而变异。所幸我们的身体有着自然的修复机制能够修复受损的细胞或通过免疫系统将无法修复的细胞消灭。

可是，由于长期的毒素累积于体内，导致自身机体的修复与免疫系统功能日渐下降。每一天，我们都遭受来自空气、食物、水和压力的毒素侵害。其中最严重的毒素，莫过于来自身体的代谢产物与自身所产生的毒素。

结果，我们的细胞失去了保护，受损的细胞也逐渐显著。随后各种疾病的症状也开始出现，而最终引发严重疾病；甚至是罹患致命性的癌症。
